Fractal Geometry Fractal geometry is a new way of looking at the world; we have been surrounded by natural patterns, unsuspected but easily recognized after only an hour's training. 1. Introduction to Fractals and IFS is an introduction to some basic geometry of fractal sets, with emphasis on the Iterated Function System (IFS) formalism for generating fractals. Introduction to Fractal Geometry Abstract. Fractals is a new branch of mathematics and art. Perhaps this is the reason why most people recognize fractals only as pretty pictures useful as backgrounds on the computer screen or original postcard patterns. Fractal Geometry and Stochastics 6 Classical fractal geometry (dimension theory, geometric measure theory, structure of fractals) Analysis, stochastics and mathematical physics on fractals and metric measure spaces Stochastic models with fractal properties - in particular networks, graphs and trees.

Fractal Geometry: Mathematical Foundations and ... Fractal Geometry: Mathematical Foundations and Applications is an excellent course book for undergraduate and graduate students studying fractal geometry, with suggestions for material appropriate for a first course indicated. The book also provides an invaluable foundation and reference for researchers who encounter fractals not only in. Fractal Geometry and Computer Graphics (eBook, 1992 ... Fractal geometry has become popular in the last 15 years, its applications can be found in technology, science, or even arts. Fractal methods and formalism are seen today as a general, abstract, but nevertheless practical instrument for the description of nature in a wide sense. The Relationship Between Fractal Geometry & Energy ... Fractal features means that the body has distinct dimensions for the geometry and the spectrum and at least one of them is a fractional number. This is quite a different behavior than that of a usual body.

What are Fractals and why should I care? â€“ George Dallas Fractal geometry also defines shapes by rules, however these rules are different to the ones in classical geometry. In fractal geometry a shape is made in two steps: first by making a rule about how to change a certain (usually classically geometric) shape.
